Where Strategy
meets Execution

Structure · Scale · Sustainability

THE PROBLEM WE SOLVE

Why ₹400 Cr companies still manage finance like a ₹50 Cr startup

Your business grew. Your profit didn't follow it. Before you automate anything - find out why.

01

**ERP Exists.
Nobody Trusts It.**

You paid for an ERP. Your finance team still runs 40 Excel templates. Data from plants arrives 3 days late and never matches HQ numbers.

02

**Finance Team is
a Compliance Unit.**

70% of their time on month-end close and GST filing. 30% on analysis. It should be the reverse - but nobody built the system for it.

03

**Your Investors See
Lagged Numbers.**

PE board meetings where the CFO presents last month's data built manually in PowerPoint, with known errors, the night before.

The problem is never the tool. It's always the architecture underneath.

WHO WE ARE

PSP Consulting

Strategic Business Transformation
& Growth Advisory

We are a specialized consulting firm that helps manufacturing companies build the financial and operational architecture needed to scale profitably - not just grow fast.

Our clients are ₹20–500 Cr businesses backed by private equity, family offices, or institutional investors - where the expectation of governance has outpaced the reality of systems.

OUR PHILOSOPHY

01 **Structure Before Scale**
Build the architecture before you accelerate

02 **Data Before Automation**
Fix the data quality before you automate it

03 **Governance Before Complexity**
Controls and ownership before systems

04 **Strategic Clarity Before Expansion**
Align systems to where you're going

WHAT WE UNDERSTAND ABOUT YOUR BUSINESS

India's largest AAC block manufacturer. 3 plants. 13 lakh CBM capacity. ₹400-500 Cr revenue. PE-backed. Institutional clients including L&T, Adani, DLF, Lodha, NBCC.

Multi-State Operations

Navsari (GJ), Wada (MH), Jhajjar (HR) - 3 plants, 3 state GST registrations, 3 plant controllers, and no single version of truth.

PE Investor Pressure

Motilal Oswal PE + India SME Investments. They expect real-time governance. You build the board pack manually, 3 days before the meeting.

Profit-EBITDA Gap

Growing EBITDA with falling profit is a working capital story. We know how to read it and fix it.

Institutional AR Risk

L&T, Adani, DLF - large outstanding receivables on long credit cycles. Without a live aging system, you're chasing ₹40–60 Cr blind.

ERP Underutilization

You have ERP infrastructure. Your team uses 35–40% of its capability. The rest is Excel, WhatsApp, and manual reconciliation.

MSME Vendor Exposure

MSME payment delay flags in your compliance data. Indicates AP workflow gaps and potential penalty exposure you may not be tracking.

OUR CAPABILITIES

Built specifically for manufacturing finance complexity

01

Financial Architecture & MIS

Redesign chart of accounts, cost centers, and MIS structure. Close your books in 3–5 days, not 15–20.

02

ERP Activation & Workflow Design

We activate the modules you already paid for. Purchase-to-pay, GRN matching, intercompany - all operational.

03

Working Capital Engineering

Debtor aging systems, inventory turn optimization, 13-week cash flow forecasting with ownership accountability.

04

Internal Controls & SOP Design

25+ process SOPs, approval matrices, exception escalation - built for multi-plant complexity, not theory.

05

Dashboarding & Decision Systems

CFO dashboard, MD view, investor board pack - automated, real-time, trusted. Not rebuilt every month-end.

06

Governance Architecture

Finance governance calendar, KPI ownership, quarterly audit plan - institutionalized, not consultant-dependent.

07

GST & Multi-State Compliance

Reconciliation tools, ITC recovery, GSTR-2B matching - 3-state complexity managed systematically.

08

Investor Reporting Systems

Board-ready MIS aligned to PE expectations. Built once, auto-generated monthly. Zero last-minute panic.

1

DIAGNOSE

Wks 1–3

- ▶ Map all F&A workflows end-to-end
- ▶ Audit ERP utilization (most at <40%)
- ▶ Quantify cost of current inefficiency
- ▶ Identify process vs data vs people gaps

2

DESIGN

Wks 3–6

- ▶ Redesign chart of accounts & cost centers
- ▶ Define single version of truth
- ▶ Spec automation sequence by ROI
- ▶ Build internal control framework

3

IMPLEMENT

Wks 6–20

- ▶ Phase A: Quick wins (MIS, AR, GST)
- ▶ Phase B: Core AP/AR, plant P&L
- ▶ Phase C: Cash flow & board pack auto
- ▶ Work inside your existing ERP stack

4

GOVERN

Mo 5–6

- ▶ Finance governance calendar
- ▶ Exception management protocols
- ▶ Working capital KPI ownership
- ▶ Complete SOP library (20+ processes)

5

OPTIMIZE

Ongoing

- ▶ Predictive cash flow forecasting
- ▶ SKU & channel profitability
- ▶ CFO co-pilot / variance analytics
- ▶ Annual governance health check

CASE STUDY

Construction Materials Manufacturer · ₹200-300 Cr Revenue · 10 Plants · Self Funded

THE SITUATION

Grew from ₹150 Cr to ₹250 Cr in 4 years on strong sales. Finance function did not keep pace. CFO managing 10 plants + 2 product lines + CFO on a team of 12, using SAP, one half-implemented ERP module, and 40+ Excel templates shared over drive.

WHAT WE FOUND

- 1 18-day monthly close. MD expected 7.
- 2 ₹42 Cr debtors aging beyond 90 days. No automated follow-up.
- 3 ITC of GST mismatches. Manual matching in Excel. Penalty risk.
- 4 No plant-wise P&L. Pricing on blended margins only.
- 5 Working capital cycle: 95 days vs 52-day industry average.

STRATEGIC OUTCOME
MD formally commended the governance turnaround. Sales Director re-priced 3 product segments using plant-level data - recovering an estimated ₹4–6 Cr in annual margin.

MEASURABLE IMPACT

18→7 days
Monthly Close Cycle

₹18 Cr
Debtors Recovered in 90 Days

95→65 days
Working Capital Cycle

₹2 Cr+
ITC Claims Recovered

4 hours
Board Pack (was 3 days)

Plant-wise P&L Report

WHY PSP - 5 REAL DIFFERENTIATORS

01

We implement. Not just advise.

Our engagements end with live systems, trained teams, and measurable outcomes - not a 120-slide deck and a handshake. You will not need us to come back to explain what we recommended.

02

We work inside your existing stack.

We do not sell software. We do not propose expensive ERP migrations. We activate modules you already paid for and build workflows where gaps exist - at a fraction of replacement cost.

03

We have done this for companies exactly like yours.

Our experience is specifically in ₹20–500 Cr multi-plant manufacturers. The complexity - multi-state GST, PE reporting, large institutional AR - is not new to us. The solutions are proven.

04

We speak both investor and operator language.

Your PE board wants governance and real-time visibility. Your MD wants speed and control. Your CFO wants accuracy and credibility. We build one system that satisfies all three simultaneously.

05

We protect your equity, not our billing.

We scope to solve the problem - not extend the engagement. When the system runs itself, we hand it over. That is how referrals happen. That is how we have built our business.

WHAT YOU CAN EXPECT

Committed outcomes by timeline

Month 1-2

✓

Monthly close cycle below 5 days

✓

GST reconciliation automated - zero mismatch backlog

✓

Live ERP data flowing from all 3 plants to HQ daily

Month 2-3

✓

CFO dashboard live - plant-wise data in real time

✓

Automated debtor aging + collections trigger workflow

✓

Approval matrices and SOPs documented & trained

Month 3-4

✓

Plant-wise contribution margin report (first ever)

✓

Board pack generated in under 4 hours

✓

MSME payment tracking system operational

Month 6

✓

13-week rolling cash flow forecast automated

✓

Working capital cycle reduced 15–20 days

✓

Finance function runs without consultant dependency

Structured Diagnostic

Before you commit to transformation, you need clarity on what to transform.

01 Map

End-to-end F&A workflow mapping across all 3 plants

02 Audit

ERP utilization gap report - what you have vs. what you use

03 Quantify

Financial exposure of current inefficiencies (time, money, risk)

04 Prioritize

Top 5 automation opportunities ranked by ROI and ease

05 Roadmap

Phased transformation plan - execution-ready, not theoretical

Let's start with a conversation.

We propose a diagnostic engagement.

No large commitment. Full clarity.

One Question Before You Decide:

If your CFO cannot tell you the contribution margin of each plant's top 3 SKUs by 9 AM on the 3rd of this month - what is that costing your pricing, your working capital, and your investor conversations?

That is the problem we are built to solve.
That is why we are having this conversation.
